## (54) VIDEO-RECORDING AND REPRODUCING DEVICE, AND METHOD FOR RECORDING AND REPRODUCING VIDEO SIGNAL

(57)Abstract:

PROBLEM TO BE SOLVED: To enable a video recording and reproducing device for simultaneously recording and reproducing video signals, and in addition, to improve the operating ease of the device.

SOLUTION: The video-recoding and reproducing device which can record video signals on a recording medium 93, and in addition, to reproduce the video signals from the medium 93 is provided with a recording means which records the video signals and identification signals, indicating the contents of the video signals on the medium 93; a displaying means which reads out the identification signals recorded on the medium 93, rearranges the identification signals, and displays the identification signals in the rearranged order; and a reproducing means which successively reproduces the video signals from the medium 93 in the rearranged order. The device detects whether vide signals being recorded exist on the medium 93, and when the device detects the presence of the video signals, successively reproduces the video signals to be reproduced when the recording of the video signals ends.
